

# Company Overview

Prevent undetectable attacks

## The Endpoint Security Gap

### NGAV, EPP, and EDR/XDR can't stop advanced cyberattacks

- 30 percent of the most popular cyberattacks are unknown and fileless/in-memory, which evade NGAV, EPP, and EDR/XDR
- Security teams are drowning in false positive alerts, and leave thousands of alerts uninvestigated

### The Result

- A security gap for supply chain attacks, data theft, ransomware, zero-days, polymorphic attacks, and more.
- **High risk:** The average cost of a breach today is \$4.35 million

## Morphisec Customers

5,000+ protected enterprises

9M endpoints and server workloads

30,000+ attacks addressed daily

“Morphisec is one of the true prevention tools out there. Morphisec’s Moving Target Defense stops the most advanced and damaging attacks without relying on signatures or behaviors, filling the gaps of our XDR solution for a true defense in depth strategy with minimal footprint and few false positives.”

Chuck Markarian  
CISO at PACCAR  
\$20B+ manufacturing co.

## The Solution: AMTD — The Evolution of Endpoint Security

- Fortify NGAV, EPP, and EDR/XDR with Morphisec’s Automated Moving Target Defense (AMTD) technology to increase threat visibility and stop attacks they don't

**PREVENT  
ADVANCED  
ATTACKS**

**NEGLIGIBLE  
PERFORMANCE  
IMPACT**

**NO ADDED  
STAFF, SLASH IT  
COSTS BY 30%**

# Morphisec's Prevention-First Security Solution

The evolution of endpoint security prevents the most damaging cyberattacks

## Stop in-memory attacks on Windows and Linux

Morphisec augments NGAV, EPP, and EDR/XDR to secure critical computing assets. Our patented and proven **AMTD** creates an unpredictable runtime memory environment threat actors can't penetrate

## Automated prevention

Stop supply chain attacks, data theft, zero-days, polymorphic attacks, ransomware, and other advanced attacks

## Reduce costs, boost operational efficiency

Ultra lightweight 6MB agent slashes false positives with no performance impact or extra staff needed

## Secure legacy systems

With no performance impact, or downtime for deployment or maintenance

## Continuous Vulnerability Visibility

Accurate application inventory visibility and app usage-based risk assessment for patch prioritization

“With Morphisec's Automated Moving Target Defense we are **10 times** more secure; we slashed false positives by 95%, and we cut costs by **two-thirds.**”

**TRUGREEN**

## Attacks Stopped at Day ZERO

Accurate application inventory visibility and app usage-based risk assessment for patch prioritization

- [New Babuk Ransomware](#)
- [Explosive Mirrorblast](#)
- [Jupyter via MSI Installer](#)
- Ransomware, info/key stealers, downloaders, supply chain attacks, fileless exploits, coin miners, banking trojans, remote access trojans (RATs), and many more

## About Morphisec

Morphisec provides prevention-first security against the most advanced threats to stop the attacks that others don't, from endpoint to the cloud. Morphisec's software is powered by Automated Moving Target Defense (AMTD) technology, the next evolution of cybersecurity. AMTD stops ransomware, supply chain attacks, zero-days, and other advanced attacks. Gartner® research shows that **AMTD is the future of cyber**. AMTD provides an ultra-lightweight, Defense-in-Depth security layer to augment solutions like NGAV, EPP and EDR/XDR. We close their runtime memory security gap against the undetectable cyberattacks with no performance impact or extra staff needed. Over 5,000 organizations trust Morphisec to protect nine million Windows and Linux servers, workloads, and endpoints. Morphisec stops thousands of advanced attacks daily at Lenovo, Motorola, TruGreen, Covenant Health, Citizens Medical Center, and many more.
